

Foundation formwork type FS

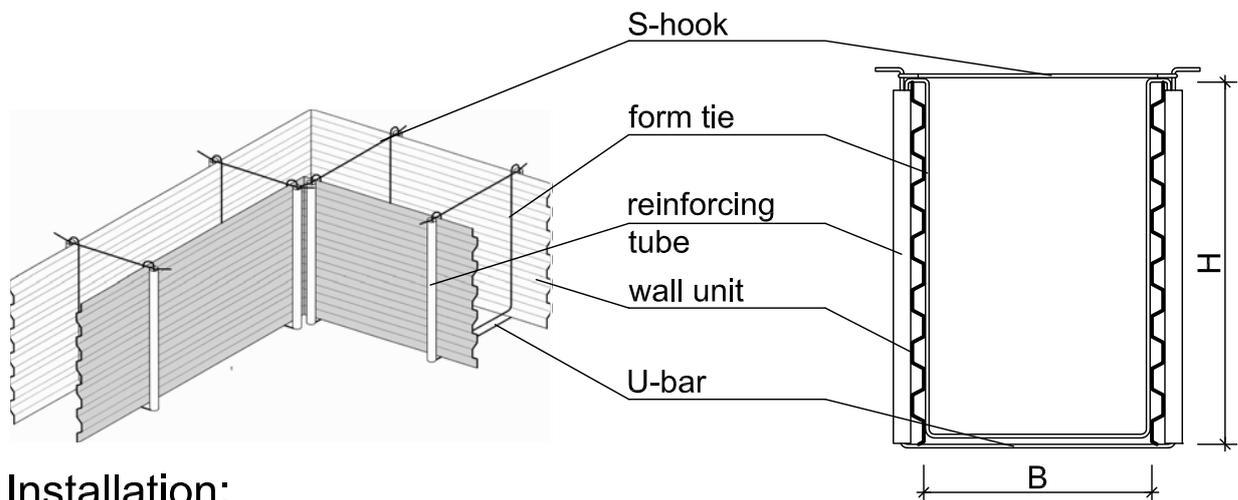

Detail

- Self-supporting foundation formwork type FS as complete assembly system with trapezoidally profiled formwork units.
- All parts are precision-made and pre-fabricated according to the layout plan.
- Due to the form ties and formbraces provided with the formwork units, the formwork is self-supporting up to a formwork height of $H = 100$ cm.

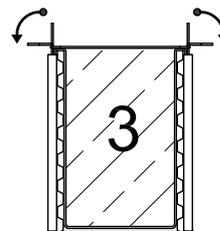

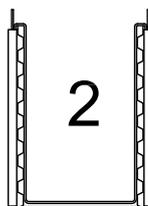

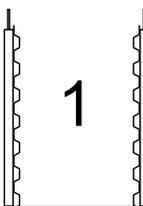

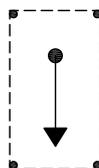

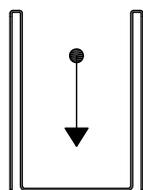

Max. length of the formwork units $L = 310$ cm

Formwork height $H = 30$ to 125 cm (greater heights on request)

Formwork width $B = 20$ to 120 cm (greater widths as type ES)

Installation:

Assemble formwork units with lab joints and fix it with formbraces.

Insert reinforcement cage.

Close formwork with S-hook fix by bending the round steel bar ends. Place concrete.
