

Foundation formwork type ES

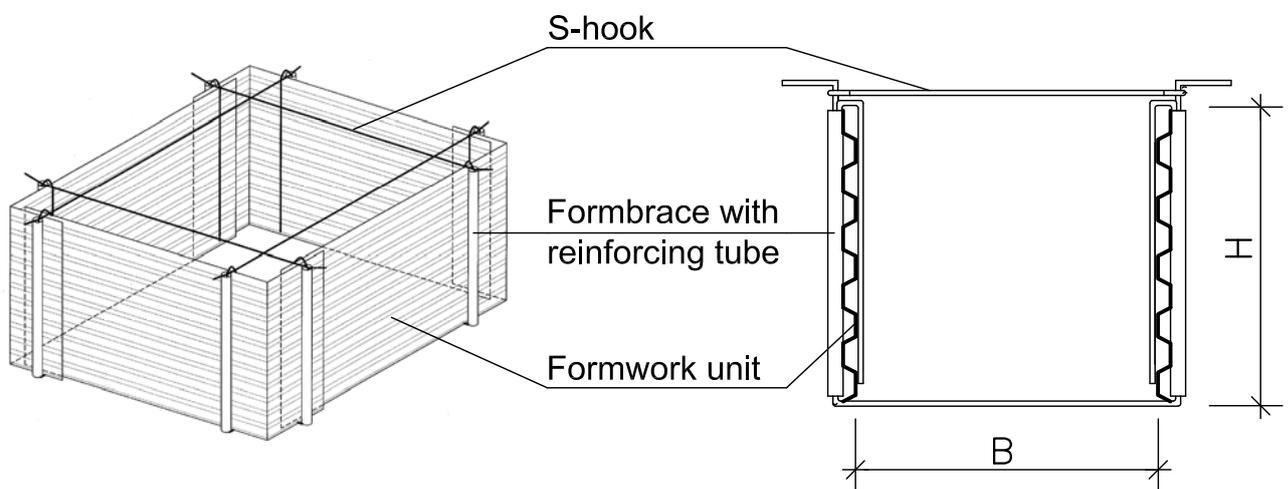

Detail

- Self-supporting foundation formwork type ES as complete assembly system with trapezoidally profiled formwork units.
- All parts are precision-made and pre-fabricated according to the layout plan.
- Due to the form ties and formbraces provided with the formwork units, the formwork is self-supporting up to a formwork height of $H = 100$ cm.

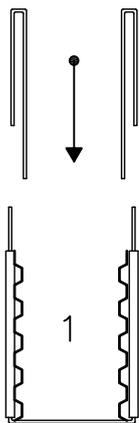

Max. length of the formwork units $L = 310$ cm

Formwork height $H = 30$ to 125 cm (greater heights on request)

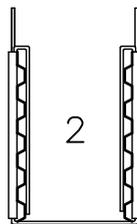

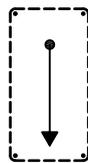

Formwork width $B = 120$ to 500 cm (smaller widths as type FS)

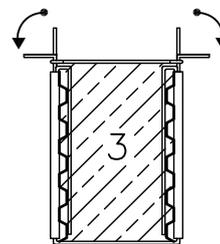

Installation:

Assemble formwork units with lap joints and fix with formbraces.

Insert reinforcement cage.

Close formwork with S-hook, fix by bending the round steel bar ends. Place concrete.
