

## Speedies® High-speed spacers - Incredibly fast, surprisingly easy!

Speedies® is the new generation of spacers for reinforcing mesh, that have surprised users around the world with their superior simplicity and cost-effectiveness. Larger than a square in a mesh, they can be laid out randomly and still always provide support for the reinforcement.

### Speedies® Ceiling

A strong, stable, pressure-resistant point spacer with little risk of tipping over.

Can be laid out by hand or ergonomically without back bending using a Speedies Dropstick. A quick release holder, which can be loaded with 50 spacers at a time.

Speedies® Ceiling is intended for use when even and/or hard cast surfaces. Works perfectly well both when casting ceilings on site and within the precast sector when casting walls. The pointed feet ensure low visibility in the concrete surfaces. Available in heights from 20 mm up to 50 mm.

Item number	Description	Unit	Qty / pallet	Normal usage
11221003	Speedies® Ceiling SH25, 20 mm with pins	Pcs	1750	1,25 - 1,5 pcs/ m <sup>2</sup>
